

Upload Tool

Introduction

Upload Tool is new feature that completes Infobip's web application and is a tailor made product that offers simple and easy way of uploading/importing data into our system for fast processing.

This service/feature is ideal tool that allows you to handle numerous senders, destinations, values and other content of messages in a more effective way and in shorter time.

Upload Tool supports different file formats like excel (.xls), notepad (.txt) and comma-separated values (.csv).

Why use Upload Tool?

Now you can have all your contacts listed in one file, sorted in columns or rows and ready for simple upload to our system.

This tool allows you to manage and organize your contacts using different file formats, in fast and simple way giving you more time to concentrate on your core business (and let the Upload Tool do the rest). You can easily send messages to a whole group of contacts with just one click.

Upload Tool key benefits

- **Simple usage and good overview of all your contacts**
- **Numerous contacts listed in one file and simply sorted into columns**
- **Your contacts organized into groups**
- **Simple upload/import of data into the system**
